focus on the essential
excellence in machine vision & robotics
Do you want to produce faster, more accurately and more sustainably? Are flexibility, quality and efficiency critical to your positioning in the market? Then you can count on us. We help you to achieve your goals in order to be one step ahead.

With long-term vision and sustainability it is our goal to bring you one step further.
Follow zero-error strategies
Optimize processes and resource efficiency
Increase productivity

With the aim of being a competent system integrator for industrial image processing and robotics, we offer solutions with intelligent cameras, PC-based vision systems, precise robots, as well as holistic test systems with highly flexible handling.

**PURE PASSION**

Medtech  
Automotive  
Watchmaking  
Packaging  
Food
Thanks to our interdisciplinary and networked engineering knowledge in automation, image processing and robotics, powerful systems are created that inspire and convince our customers. With long-term vision and sustainability, our goal is to keep you up to date.

CONVINCED BY PERFORMANCE

Thanks to our interdisciplinary and networked engineering knowledge in automation, image processing and robotics, powerful systems are created that inspire and convince our customers. With long-term vision and sustainability, our goal is to keep you up to date.
